Install RSA SecurID Software Token for iOS and Activate using a QR code scan

Step 1: On your mobile device go to:
    For a State-owned device go to the AirWatch Catalog
    For a Personal device go to the App Store

Step 2: Look for ***RSA SecurID Software Token*** and click install. Open the application when the install completes. This is in preparation for a later step.

Step 3: On a separate device (PC or Laptop) open a browser and navigate to **https://mo2fss.mo.gov/** .

Step 4: Enter your network userID that is associated with your access to State of Missouri resources. Click on OK
    (Note: Do NOT put the domain with your user ID (i.e. ADS, BDS, CDS, EXTLOCAL, etc.)

Step 5: Make sure the *Authentication Method* is set to password and click *Log On*

Step 6: Enter the password that is associated with the network userID from Step 4 and click *Log On*

Step 7: In the section titled *My Authenticators* click on the *Activate Your Token* link.

Step 8: You will now see an *Activate Your Token* pop-up window with a QR code similar to the example below.

Step 9: On the iOS device
1. Ensure that the RSA SecurID program is open
2. Import the token using QR Scan (this uses the camera on your phone. If prompted click OK on the message for "RSA SecureID" Would Like to Access the Camera)
3. Use the camera of the iOS device to scan the QR code.
4. You will receive a message stating that the token successfully imported. Click OK and then you should see a six-digit RSA SecureID Tokencode.

Step 10: On the computer, Click *Close* on the *Activate Your Token* window.

Step 11: Please ensure that you click *Log Off* in the top right corner of the browser window

Step 12: On the iOS device the RSA SecurID Tokencode app will be generating a six-digit code that changes every 60 seconds. Please close the app when a code is not needed.

The next time you need an RSA token code, you will just need to open the RSA SecurID app on your iOS device.
